Number 1

Original Communications:

Quantitative Analysis of the Vectorcardiogram in Obesity. The Effects of Weight Reduction
By *C. R. Brohet and N. Tuna* 1

Failure of the Omnicardiogram to Predict Coronary Artery Disease in Patients with Normal Resting Electrocardiograms
By *K. Redy, F. Smithline, B. T. Zeman, R. I. Hamby and I. Hoffman* 13

The Influence of Norepinephrine, Reserpine and Propranolol on Overdrive Suppression
By *M. B. Pliam, D. J. Krellenstein, M. Vassalle and C. McC. Brooks* 17

Origin of Initial Escape Beat During Graded Vagal Stimulation
By *C. N. Peiss and H. A. Spurgeon* 25

The Quantitative Effects of Coronary-Myocardial Ischemia on the S-Q Integrals of Epicardial Electrograms in the Dog
By *E. V. Newman, T. R. Harris and T. G. Arnold* 31

The Influence of Exercise on Atrial Flutter
By *A. S. Gooch and D. R. Sumathisena* 39

Two-Step Electrocardiogram for Chest Pain Reported on Multiphasic Screening
By *A. Skoulas and D. Conlon* 49

Special Article:

ECG Data Acquisition: A Discussion
By *G. E. Dower, J. A. Osborne, O. Suranyi, D. E. Stewart and K. Bonham* 53

Case Studies:

Wenckebach Phenomenon Within the Atria
By *N. Kerin and H. Schwartz* 61

Evidence for Specialized Atrioventricular Conduction in Hyperkalemia
By *T. T. Bashour and T. O. Cheng* 65

An Analysis of the Circadian Rhythmicity of Atrial and Ventricular Rates in Complete Heart Block
By *J. E. Christ and H. E. Hoff* 69

Idioventricular Tachycardia with Angina Pectoris
By *B. Wong, J. Brymer, J. Goheen and M. Dunn* 73

Review:

Junctional Reciprocating Tachycardias. The Permanent and Paroxysmal Forms of A-V Nodal Reciprocating Tachycardias
By *P. Coumel* 79

Recent Progress in Cardiac Pacing:

Therapeutic Usefulness of Chest Wall Stimulation in Patients with Demand Pacemakers
By *A. Varenne and S. S. Barold* 91

Number 2

Original Communications:
The Relative Risk of Spontaneous Complete Atrioventricular Block in Elderly Patients with Impaired Intra-Ventricular Conduction
By *J. W. Snyder, L. L. Basta and R. F. Woolson* 95
P Wave Abnormalities in the Orthogonal Electrocardiogram: Correlation with Ventricular Overload in Pulmonic and Aortic Valvular Heart Disease
By *C. R. Brohet, C-E. Liedtke and N. Tuna* 103
Ventricular Activation Process in Minipigs
By *R. L. Hamlin, R. R. Burton, S. D. Leverett and J. W. Burns* 113
A Cellular Model for the Simulation of Activation in the Ventricular Myocardium
By *W. J. Eifler and R. Plonsey* 117
The QRS Phasic Characteristics of Right Ventricular Hypertrophy in Precordial Leads
By *T. Y. Lee* 129
Determination of the Locus of the Heart Vector from Body Surface Measurements: Model Experiments
By *C. V. Nelson, B. C. Hodgkin and P. C. Voukydis* 135
Semi-Automated ECG Processing: A Simple Method to Improve Efficiency in ECG Laboratories
By *J. C. Rios, M. Shaffer, R. Rose, M. Wilbur and J. Whiteman* 147
Quantitative Vectorcardiographic Criteria for the Differentiation Between Atrial Septal Defects of Primum and Secondum Types
By *K. Rasmussen* 153
Electrocardiographic Screening by Special Purpose Computer. Correlation with Twelve-Lead Electrocardiogram
By *A. G. de Carvalho* 163
The Normal Electrocardiogram of the Domestic Pony
By *D. D. Buss, C. A. Rawlings and G. E. Bisgard* 167
Case Studies:
Significance of Episodic Painless ST Segment Elevation at Rest in Ischemic Heart Disease
By *N. A. Haberern, F-U Khaja and S. S. Barold* 173
Direct and Incomplete Concealed Wenckebach Phenomena in the Left Bundle Branch
By *N. Kerin, J. Edelstein, G. Louridas and L. B. Goldberg* 179
Complete Heart Block with Normal QRS Duration Occurring Distal to the His Bundle in Acute Inferior Myocardial Infarction
By *T. T. Bashour, H. Fahdul and T. O. Cheng* 185
Mid-Systolic Click, Late Systolic Murmur Syndrome Associated with Complete Heart Block
By *C. Martin* 191
Recent Progress in Cardiac Pacing:
The Reliability of Pacemaker Electrode-Leads
By *G. D. Green* 195

Number 3

Original Communications:
Computer Interpretation of Frank Vectorcardiogram in Normal Infant: Longitudinal and Cross-Sectional Observations from Birth to Two Years of Age
By *B. Guller, P.C. O'Brien, R.E. Smith, W.H. Weidman and J.W. DuShane* 201
Overdrive Suppression in Diagnosis of Sick Sinus Syndrome
By *J. Toyama, A. Ito, K. Sawada, T. Ito, Y. Tanahashi, T. Tsuzuki, T. Watanabe and S. Yasui* 209
VECTAN II: A Computer Program for the Spatial Analysis of the Vectorcardiogram
By *D.P. Golden, Jr., G.W. Hoffler, R.A. Wolthuis and R.L. Johnson* 217
Mean QRS, Ventricular Gradient and Left Ventricular Mass in Patients with Eccentric Left Ventricular Hypertrophy
By *K. Ishizawa* 227
On the Relationship Between Heart Weights, Fibrosis, and QRS Duration
By *A. Mazzoleni, M.E. Curtin, R. Wolff and L. Reiner* 233
Trans-Chest Ventricular Defibrillation of Heavy Subjects Using Trapezoidal Current Waveforms
By *W.A. Tacker, Jr., L.A. Geddes, J.P. Rosborough, D. Witzel, P.S. Cabler, R.J. Chapman and R.A. Rivera* 237
The Electrocardiogram of Burros
By *T. Morimoto, S.M. Horvath and M.K. Yousef* 241
Electrocardiographic Studies in the Stumptail Macaque *(Macaca arctoides)*
By *V. Malhotra, R. Pick, A. Pick and G. Glick* 247
A Device for Producing High Frequency Electrocardiograms on a Conventional Direct Writing Electrocardiograph
By *D.B. Geselowitz, J. Balogh and R.R. Bishop* 253
Case Studies:
Exit Block in Sustained Atrial Tachycardia in Two Children
By *J.R. Jacobsen* 259
His Bundle Electrogram in Congenitally Corrected Transposition of the Great Vessels
By *T.T. Bashour, H. Fahdul and T.O. Cheng* 265
His Bundle Electrogram in Trifascicular Disease: Report of a Case Studied with His Bundle Electrograms
By *L.A. Iannone, S.P. Glasser and R.J. McCarty* 269
Transient ST Segment Elevation Occurring Without Anginal Pain. Correlations with Prinzmetal's Angina
By *P. Chiche and R. Haïat* 275
Sinus and A-V Nodal Dysfunction Following Myocardial Infarction
By *D. Sinker, R. Parameswaran and H. Goldberg* 281
Annotation:
Sum of Two Vectors Having an Included Angle Greater Than Ninety Degrees
By *C.V. Nelson and B.C. Hodgkin* 285
Recent Progress in Cardiac Pacing:
Pacing Techniques in the Management of Supraventricular Tachycardias
Part I: The Use of High Frequency Stimulation (HFS) in the Management of Paroxysmal Supraventricular Tachycardia
By *R.A.J. Spurrell and E. Sowton* 287

Number 4

Editorial:
Indications for Pacing After Acute Myocardial Infarction in Patients With Fascicular Blocks
By *C.B. Mullins* 297

Original Communications:
Microelectrode Study of High Grade Block in Canine Purkinje Fibers
By *J.R. Wennemark, J.P. Bandura, D.A. Brody and V.J. Ruesta* 299

An Analysis of Wenckebach Periodicity
By *H.S. Friedman, J.A.C. Gomes and J.I. Haft* 307

Left Bundle Branch Block and Coronary Artery Disease
By *W.H. Herbert* 317

Measuring Ventricular Extrasystoles
By *S. Talbot* 325

Prognosis of Left Anterior Hemiblock in Acute Myocardial Infarction
By *L. Gould, J. Riedel, C.V. Ramana Reddy and R.F. Gomprecht* 333

Relation of Left Ventricular Contractile Patterns in Coronary Artery Disease to the Electrocardiogram and Vectorcardiogram
By *J. Hilsenrath, F. Tabrah, R.I. Hamby and I. Hoffman* 335

Case Studies:
Refractory Paroxysmal Supraventricular Tachycardia Incited By Multiple Mechanisms
By *P. Walter and L. Lesser* 343

Mobitz Type I Atrioventricular Block in the Ventricular Specialized Conduction System
By *M.S. Dhatt, E.I. Curtiss and J.A. Shaver* 351

Persistent Atrial Standstill, Report of Three Cases
By *A. Kurokawa, A. Kurita, G. Kasai and E. Kimura* 357

Chronic Binodal Block With Wenckebach Phenomenon
By *W.G. Frey, III, and J.L. Grant* 363

Annotation:
A Simple Method of Checking the ECG Paper Speed
By *H.N. Uhley* 369

Recent Progress in Cardiac Pacing:
Therapeutic Uses of Permanent Pervenous Atrial Pacemakers: A Review
By *A.J. Moss* 373

The Triple Pulse Generator: Clinical Evaluation of a New Multipurpose External Pulse Generator
By *S.S. Barold* 381

Index 391

ACKNOWLEDGMENT

The editorial staff wishes to express its gratitude to the individuals who served as guest reviewers during the past year. We greatly appreciate their assistance.

Jacques Billette, M.D., Ph.D.
University of Montreal
Montreal, Que., Canada

Richard Cheng, Ph.D.
Rochester Institute of Technology
Rochester, NY

A. N. Damato, M.D.
U.S. Public Health Service
New York, NY

David C. Dean, M.D.
VA Hospital
Buffalo, NY

Kenneth B. Desser, M.D.
Institute for Cardiovascular Diseases
Phoenix, AZ

A.V.N. Goodyer, M.D.
Yale University
New Haven, CT

Nancy Haberern, M.D.
University of Rochester
Rochester, NY

Paul J. Ioannidis, M.D.
Athens University
Athens, Greece

Rose London, M.D.
Miami, FL

Hsin-Hsiang Lu, M.D., Ph.D.
National Defense Medical Center
Taipei, Taiwan, China

William J. Mandel, M.D.
Cedars-Sinai Medical Center
Los Angeles, CA

Kay Millar, M.D.
University of Utah
Salt Lake City, UT

J. A. Osborne, M.D.
Vancouver General Hospital
Vancouver, B.C., Canada

Yen Shen, M.D.
Jackson County Hospital
Kansas City, MO

Joseph F. Spear, Ph.D.
University of Pennsylvania
Philadelphia, PA

Rudolph F. Trost, M.D.
Methodist Hospital
Houston, TX

Zakauddin Vera, M.D.
University of California
Davis, CA

K. Wang, M.D.
Mount Sinai Hospital
Minneapolis, MN

Michael J. Wolk, M.D.
New York, NY

R. F. Wyatt, Ph.D.
University of Utah
Salt Lake City, UT

Barry L. Zaret, M.D.
Yale University
New Haven, CT

Subject Index Volume 8

A

Angina pectoris
idioventricular tachycardia with, 1:73-77

Animal studies
burros
ECG of, 3:241-246
dogs
influence of norepinephrine, reserpine, and propranolol on overdrive suppression, 1:17-24
microelectrode study of high grade block in canine Purkinje fibers, 4:299-306
origin of initial escape beat during graded vagal stimulation, 1:25-29
quantitative effects of coronary-myocardial ischemia on S-Q integrals of epicardial electrograms in, 1:31-38
macaques
ECG studies in stumptail macaque, 3:247-251
minipigs
ventricular activation process in, 2:113-116
pony
normal ECG of domestic, 2:167-172
trans-chest ventricular defibrillation of heavy subjects using trapezoidal current waveforms, 3:237-240

Annotation
simple method of checking ECG paper speed, 4:369-371
sum of 2 vectors having included angle greater than ninety degrees, 3:285-286

Atrial
block
Wenckebach phenomenon within atria, 1:61-64
flutter
influence of exercise on, 1:39-48
pacing
analysis of Wenckebach periodicity, 4:307-316
overdrive suppression in diagnosis of sick sinus syndrome, 3:209-216
pacing techniques in management of supraventricular tachycardias, Part I, 3:287-295
refractory paroxysmal supraventricular tachycardia incited by multiple mechanisms, 4:343-349
therapeutic uses of permanent pervenous atrial pacemakers: a review, 4:373-380
septal defects
quantitative VCG criteria for differentiation between atrial septal defects of primum and secundum types, 2:153-162

Atropine
complete heart block with normal QRS duration occurring distal to His bundle in acute inferior myocardial infarction, 2:185-190

A-V block, *see* Block

Atrio-ventricular conduction
evidence for specialized A-V conduction in hyperkalemia, 1:65-68
influence of exercise on atrial flutter, 1:39-48
refractory paroxysmal supraventricular tachycardia incited by multiple mechanisms, 4:343-349
relative risk of spontaneous complete A-V block in elderly patients with impaired intra-ventricular conduction, 2:95-102
sinus and A-V nodal dysfunction following myocardial infarction, 3:281-283

Atrio-ventricular nodal reentry
refractory paroxysmal supraventricular tachycardia incited by multiple mechanisms, 4:343-349

B

Block
analysis of circadian rhythmicity of atrial and ventricular rates in complete heart block, 1:69-72
chronic binodal block with Wenckebach

phenomenon, 4:365-370
exit block in sustained atrial tachycardia in two children, 3:259-264
His bundle electrogram in trifascicular disease: report of case studied with His bundle electrograms, 3:269-273
indications for pacing after acute myocardial infarction in patients with fascicular, 4:297-298
left bundle branch block and coronary artery disease, 4:317-324
microelectrode study of high grade block in canine Purkinje fibers, 4:299-306
mid-systolic click, late systolic murmur syndrome associated with complete heart block, 2:191-194
Mobitz
complete heart block with normal QRS duration occurring distal to His bundle in acute inferior myocardial infarction, 2:185-190
type I A-V block in ventricular specialized conduction system, 4:351-356
prognosis of left anterior hemiblock in acute myocardial infarction, 4:333-334
relative risk of spontaneous complete A-V block in elderly patients with impaired intra-ventricular conduction, 2:95-102

Bundle branch, left
direct and incomplete concealed Wenckebach phenomena in left bundle branch system, 2:179-183
block and coronary artery disease, 4:317-324

C

Cardiac delay
origin of initial escape beat during graded vagal stimulation, 1:25-29

Case studies
analysis of circadian rhythmicity of atrial and ventricular rates in complete heart block, 1:69-72
chronic binodal block with Wenckebach phenomenon, 4:363-368
complete heart block with normal QRS duration occurring distal to His bundle in acute inferior myocardial infarction, 2:185-190
direct and incomplete concealed Wenckebach phenomena in left bundle branch system, 2:179-183
evidence for specialized atrioventricular conduction in hyperkalemia, 1:65-68
exit block in sustained atrial tachycardia in two children, 3:259-264
His bundle electrogram in congenitally corrected transposition of great vessels, 3:265-268
idioventricular tachycardia with angina pectoris, 1:73-77
mid-systolic click, late systolic murmur syndrome associated with complete heart block, 2:191-194
Mobitz type I A-V block in the ventricular specialized conduction system, 4:351-356
persistent atrial standstill, report of 3 cases, 4:357-362
refractory paroxysmal supraventricular tachycardia incited by multiple mechanisms, 4:343-349
significance of episodic painless ST segment elevation in ischemic heart disease, 2:173-177
sinus and A-V nodal dysfunction following myocardial infarction, 3:281-283
transient ST segment elevation occurring without anginal pain. Correlations with Prinzmetal's angina, 3:275-280
Wenckebach phenomenon within the atria, 1:61-64

Cellular cardiology
cellular model for simulation of activation in ventricular myocardium, 2:117-128
microelectrode study of high grade block in canine Purkinje fibers, 4:299-306

Chest wall stimulation
therapeutic usefulness of chest wall stimulation in patients with demand pacemakers, 1:91-93

Children
computer interpretation of Frank VCG in normal infant: longitudinal and cross-sectional observations from birth to two years of age, 3:201-208
exit block in sustained atrial tachycardia in two, 3:259-264

Circadian rhythm
analysis of circadian rhythmicity of atrial and ventricular rates in complete heart block, 1:69-72

Computers
cellular model for simulation of activation in ventricular myocardium, 2:117-128
ECG data acquisition. A discussion, 1:53-59
electrocardiographic screening by special purpose computer. Correlation with twelve-lead ECG, 2:163-166
interpretation of Frank VCG in normal infant: longitudinal and cross-sectional observations from birth to two years of ago, 3:201-208
semi-automated ECG processing: simple method to improve efficiency in ECG laboratory, 2:147-151
VECTAN II: a computer program for spatial analysis of VCG, 3:217-225

Contractile defects
relation of left ventricular contractile patterns in coronary artery disease to ECG and VCG, 4:335-342

Coronary artery disease
failure of omnicardiogram to predict coronary artery disease in patients with normal resting ECGs, 1:13-16
left bundle branch block and, 4:317-324
relation of left ventricular contractile patterns in coronary artery disease to ECG and VCG, 4:335-342

Corrected transposition
His bundle electrogram in congenitally corrected transposition of great vessels, 3:265-268

Coupling intervals
measuring ventricular extrasystoles, 4:325-331

D

Defibrillators
trans-chest ventricular defibrillation of heavy subjects using trapezoidal current waveforms, 3:237-240

Depolarization
microelectrode study of high grade block in canine Purkinje fibers, 4:299-306

Dipole
determination of locus of heart vector from body surface measurements: model experiments, 2:135-146

E

Electrocardiogram
integration
quantitative effects of coronary-myocardial ischemia on S-Q integrals of epicardial electrograms in dog, 1:31-38
procedures
device for producing high frequency ECGs on conventional direct writing electrocardiograph, 3:253-258
semi-automated ECG processing: simple method to improve efficiency in ECG laboratories, 2:147-151
simple method of checking ECG paper speed, 4:369-371
relation of left ventricular contractile patterns in coronary artery disease to ECG and VCG, 4:335-342
SVEC III
P-wave abnormalities in orthogonal ECG: correlation with ventricular overload in pulmonic and aortic valvular heart disease, 2:103-112

Electrogram
His bundle electrogram in congenitally corrected transposition of great vessels, 3:265-268
His bundle electrogram in trifascicular disease: report of case studied with His bundle electrogram, 3:269-273

Electrocardiometer
electrocardiographic screening by special purpose computer. Correlation with twelve-lead ECG, 2:163-166

Electrode-leads
reliability of pacemaker, 2:195-200

Electrotonus
microelectrode study of high grade block in canine Purkinje fibers, 4:299-306

Escape beat
origin of initial escape beat during graded vagal stimulation, 1:25-29

Exercise
idioventricular tachycardia with angina pectoris, 1:73-77
influence of exercise on atrial flutter, 1:39-48
two-step ECG for chest pain reported on multi-phasic screening, 1:49-52

G

Gabor-Nelson equations
determination of locus of heart vector from body surface measurements: model experiments, 2:135-146

H

Heart weight
on relationship between heart weights, fibrosis and QRS duration, 3:233-236

Hemiblock, *see* Block

His bundle
electrogram in congenitally corrected transposition of great vessels, 3:265-268
electrogram in trifascicular disease: report of cases studied with His bundle electrograms, 3:269-273

Hyperkalemia
evidence for specialized atrioventricular conduction in, 1:65-68

Hypertrophy
mean QRS, ventricular gradient and left ventricular mass in patients with eccentric left ventricular, 3:227-232
QRS phasic characteristics of right ventricular hypertrophy in precordial leads, 2:129-133
sum of two vectors having included angle greater than ninety degrees, 3:285-286

I

Instrumentation
device for producing high frequency ECGs on conventional direct writing electrocardiograph, 3:253-258
reliability of pacemaker electrode-leads, 2:195-200
triple pulse generator: clinical evaluation of new multipurpose external pulse generator, 4:381-389

Interectopic interval
measuring ventricular extrasystoles, 4:325-331

Ischemic heart disease
significance of episodic painless ST segment elevation at rest in, 2:173-177
two-step ECG for chest pain reported on multiphasic screening, 1:49-52

L

Locuscardiography
determination of locus of heart vector from body surface measurements: model experiments, 2:135-146

M

Mathematics
sum of two vectors having included angle greater than ninety degrees, 3:285-286

Methodology
determination of locus of heart vector from body surface measurements: model experiments, 2:135-146
semi-automated ECG processing: simple method to improve efficiency in ECG laboratories, 2:147-151
simple method of checking ECG paper speed, 4:369-371

Mid-systolic click
and late systolic murmur syndrome associated with complete heart block, 2:191-194

Model
cellular model for simulation of activation in ventricular myocardium, 2:117-128

Multiphasic screening
two-step ECG for chest pain reported on, 1:49-52

Myocardial fibrosis
on relationship between heart weights, fibrosis, and QRS duration, 3:233-236

Myocardial infarction
complete heart block with normal QRS duration occurring distal to His bundles in acute inferior, 2:185-190
indications for pacing after acute myocardial infarction in patients with fascicular blocks, 4:297-298
prognosis of left anterior hemiblock in acute, 4:333-334
sinus and A-V nodal dysfunction following, 3:281-283

Myocardial ischemia
quantitative effects of coronary-myocardial ischemia on S-Q interval of epicardial electrograms in dog, 1:31-38

N

Norepinephrine
influence of norepinephrine, reserpine, and propranolol on overdrive suppression, 1:17-24

O

Obesity
quantitative analysis of VCG in obesity. The effects of weight reduction, 1:1-11

Omnicardiogram
failure of omnicardiogram to predict coronary artery disease in patients with normal resting ECGs, 1:13-16

Overdrive suppression
in diagnosis of sick sinus syndrome, 3:209-216
influence of norepinephrine, reserpine, and propranolol on, 1:17-24

P

Pacemakers
indications for pacing after acute myocardial infarction in patients with fascicular block, 4:297-298
overdrive suppression in diagnosis of sick sinus syndrome, 3:209-216
pacing techniques in management of supraventricular tachycardias, Part I, 3:287-295
reliability of pacemaker electrode-leads, 2:195-200
therapeutic usefulness of chest wall stimulation in patients with demand, 1:91-93
therapeutic uses of permanent pervenous atrial pacemakers: a review, 4:373-380
triple pulse generator: clinical evaluation of new multipurpose external pulse generator, 4:381-389

Persistent atrial standstill
report of three cases, 4:357-362

Phase-progression
QRS phasic characteristics of right ventricular hypertrophy in precordial leads, 2:129-133

Planar loop
QRS phasic characteristics of right ventricular hypertrophy in precordial leads, 2:129-133

Prinzmetal's angina
transient ST segment elevation occurring without angina pain. Correlations with, 3:275-280

Propranolol
influence of norepinephrine, reserpine, and propranolol on overdrive suppression, 1:17-24

Purkinje fibers
influence of norepinephrine, reserpine, and propranolol on overdrive suppression, 1:17-24
microelectrode study of high grade block in canine, 4:299-306

Q

QRS duration
on relationship between heart weights, fibrosis and, 3:233-236

R

Reactive hyperemia
quantitative effects of coronary-myocardial ischemia on S-Q intervals of epicardial electrograms in dog, 1:31-38

Reentry mechanism
junctional reciprocating tachycardias. The permanent and paroxysmal forms of A-V nodal reciprocating tachycardias, 1:79-90

Reserpine
influence of norepinephrine, reserpine, and propranolol on overdrive suppression, 1:17-24

S

Sick sinus syndrome
overdrive suppression in diagnosis of, 3:209-216

Sinus bradycardia
sinus and A-V nodal dysfunction following myocardial infarction, 3:281-283

ST segment
significance of episodic painless ST segment elevation at rest in ischemic heart disease, 2:173-177
transient ST segment elevation occurring without anginal pain. Correlations with Prinzmetal's angina, 3:275-280

ST-T changes
quantitative effects of coronary-myocardial ischemia on S-Q intervals of epicardial electrograms in dog, 1:31-38

Syncope
sinus and A-V nodal dysfunction following myocardial infarction, 3:281-283

Systolic murmur syndrome
mid-systolic click, late systolic murmur syndrome associated with complete heart block, 2:191-194

T

Tachycardia
exit block in sustained atrial tachycardia in two children, 3:259-264
idioventricular tachycardia with angina pectoris, 1:73-77
junctional reciprocating tachycardias. The permanent and paroxysmal forms of A-V nodal reciprocating tachycardias, 1:79-90
pacing techniques in management of supraventricular tachycardia, Part I, 3:287-295
refractory paroxysmal supraventricular tachycardia incited by multiple mechanisms, 4:343-349

Testing
stress
VECTAN II: a computer program for spatial analysis of VCG, 3:217-225
treadmill
influence of exercise on atrial flutter, 1:39-48

V

Vagal stimulation
origin of initial escape beat during, 1:25-29

Valvular heart disease
P-wave abnormalities in orthogonal ECG: correlation with ventricular overload in pulmonic and aortic, 2:103-112

Vectorcardiography
computer interpretation of Frank VCG in normal infant: longitudinal and cross-sectional observations from birth to two years of age, 3:201-208
quantitative analysis of VCG in obesity. The effects of weight reduction, 1:1-11
quantitative VCG criteria for differentiation between atrial septal defects of primum and secundum types, 2:153-162
relation of left ventricular contractile patterns in coronary artery disease to ECG and VCG, 4:335-342
VECTAN II: a computer program for spatial analysis of, 3:217-225

Vectors
sum of two vectors having included angle greater than ninety degrees, 3:285-286

Ventricular activation
cellular model for simulation of activation in ventricular myocardium, 2:117-128
ventricular activation process in minipigs, 2:113-116

Ventricular extrasystoles
measuring, 4:325-331

Ventricular gradient
mean QRS, ventricular gradient and left ventricular mass in patients with eccentric left ventricular hypertrophy, 3:227-232

W

Wave
P-
abnormalities in orthogonal ECG: correlation with ventricular overload in pulmonic and aortic valvular heart disease, 2:103-112
persistent atrial standstill, report of three cases, 4:357-362

Waveforms
QRS phasic characteristics of right ventricular hypertrophy in precordial leads, 2:129-133
trans-chest ventricular defibrillation of heavy subjects using trapezoidal current waveforms, 3:237-240

Weight reduction
quantitative analysis of VCG in obesity. The effects of, 1:1-11

Wenckebach phenomenon
analysis of Wenckebach periodicity, 4:307-315
chronic binodal block with, 4:363-368
complete heart block with normal QRS duration occurring distal to His bundle in acute inferior myocardial infarction, 2:185-190
direct and incomplete concealed Wenckebach phenomenon in left bundle branch system, 2:179-183
within the atria, 1:61-64
